

Product Introduction

F&B management reinvented, for good.

Introducing GoGmGo, a purpose-built, **all-in-one digital F&B management** operating platform to help operators increase survivability, profitability and customer experience.

RUNNING AN F&B BUSINESS

IS COMPLICATED

Multiple
un-linked systems

Systems are time
And energy sapping

Many off-line and
Manual processes

IT IS HARD FOR F&B OPERATORS TO DELIVER ON THEIR PRIORITIES

1

SERVING CUSTOMERS

- Many platforms for reservations and orders
 - Multiple menus and customizations
 - Dealing with promos and loyalty schemes
-

2

MANAGING OPERATIONS

- Scheduling and monitoring staff
 - Driving productivity improvements
 - Tracking inventory and ordering supplies
-

3

FINANCIAL REPORTING AND UNDERSTANDING PERFORMANCE

- Daily, weekly, monthly reconciliation
- Decision-making with limited and old data
- Dependence on accountants and excel

GOGMGO SIMPLIFIES RUNNING AN F&B BUSINESS

Avoid the cost and headache of using multiple systems and manual processes by using GoGmGo's **all-in-one cloud based solution for F&B**

- Full accounting functionality
- Menu management with high customizability and auto publishing to sites
- Recipe and inventory management
- Order generation
- HR management
- Supplier management
- Reporting and insights

iPad App giving you all of the speed, scalability, and functionality you need without the expensive hardware

Android and iPhone Apps for chefs to see inventory, procure supplies, and perform stock takes

Android and iPhone Apps for staff rostering, geo-tagged check-in/out, and much more

Avoid data reentry and errors as it now flows from and to other Apps, e.g., food delivery, loyalty and CRM

Self-service ordering by customers on their own device at home, on-the-go, or at a table

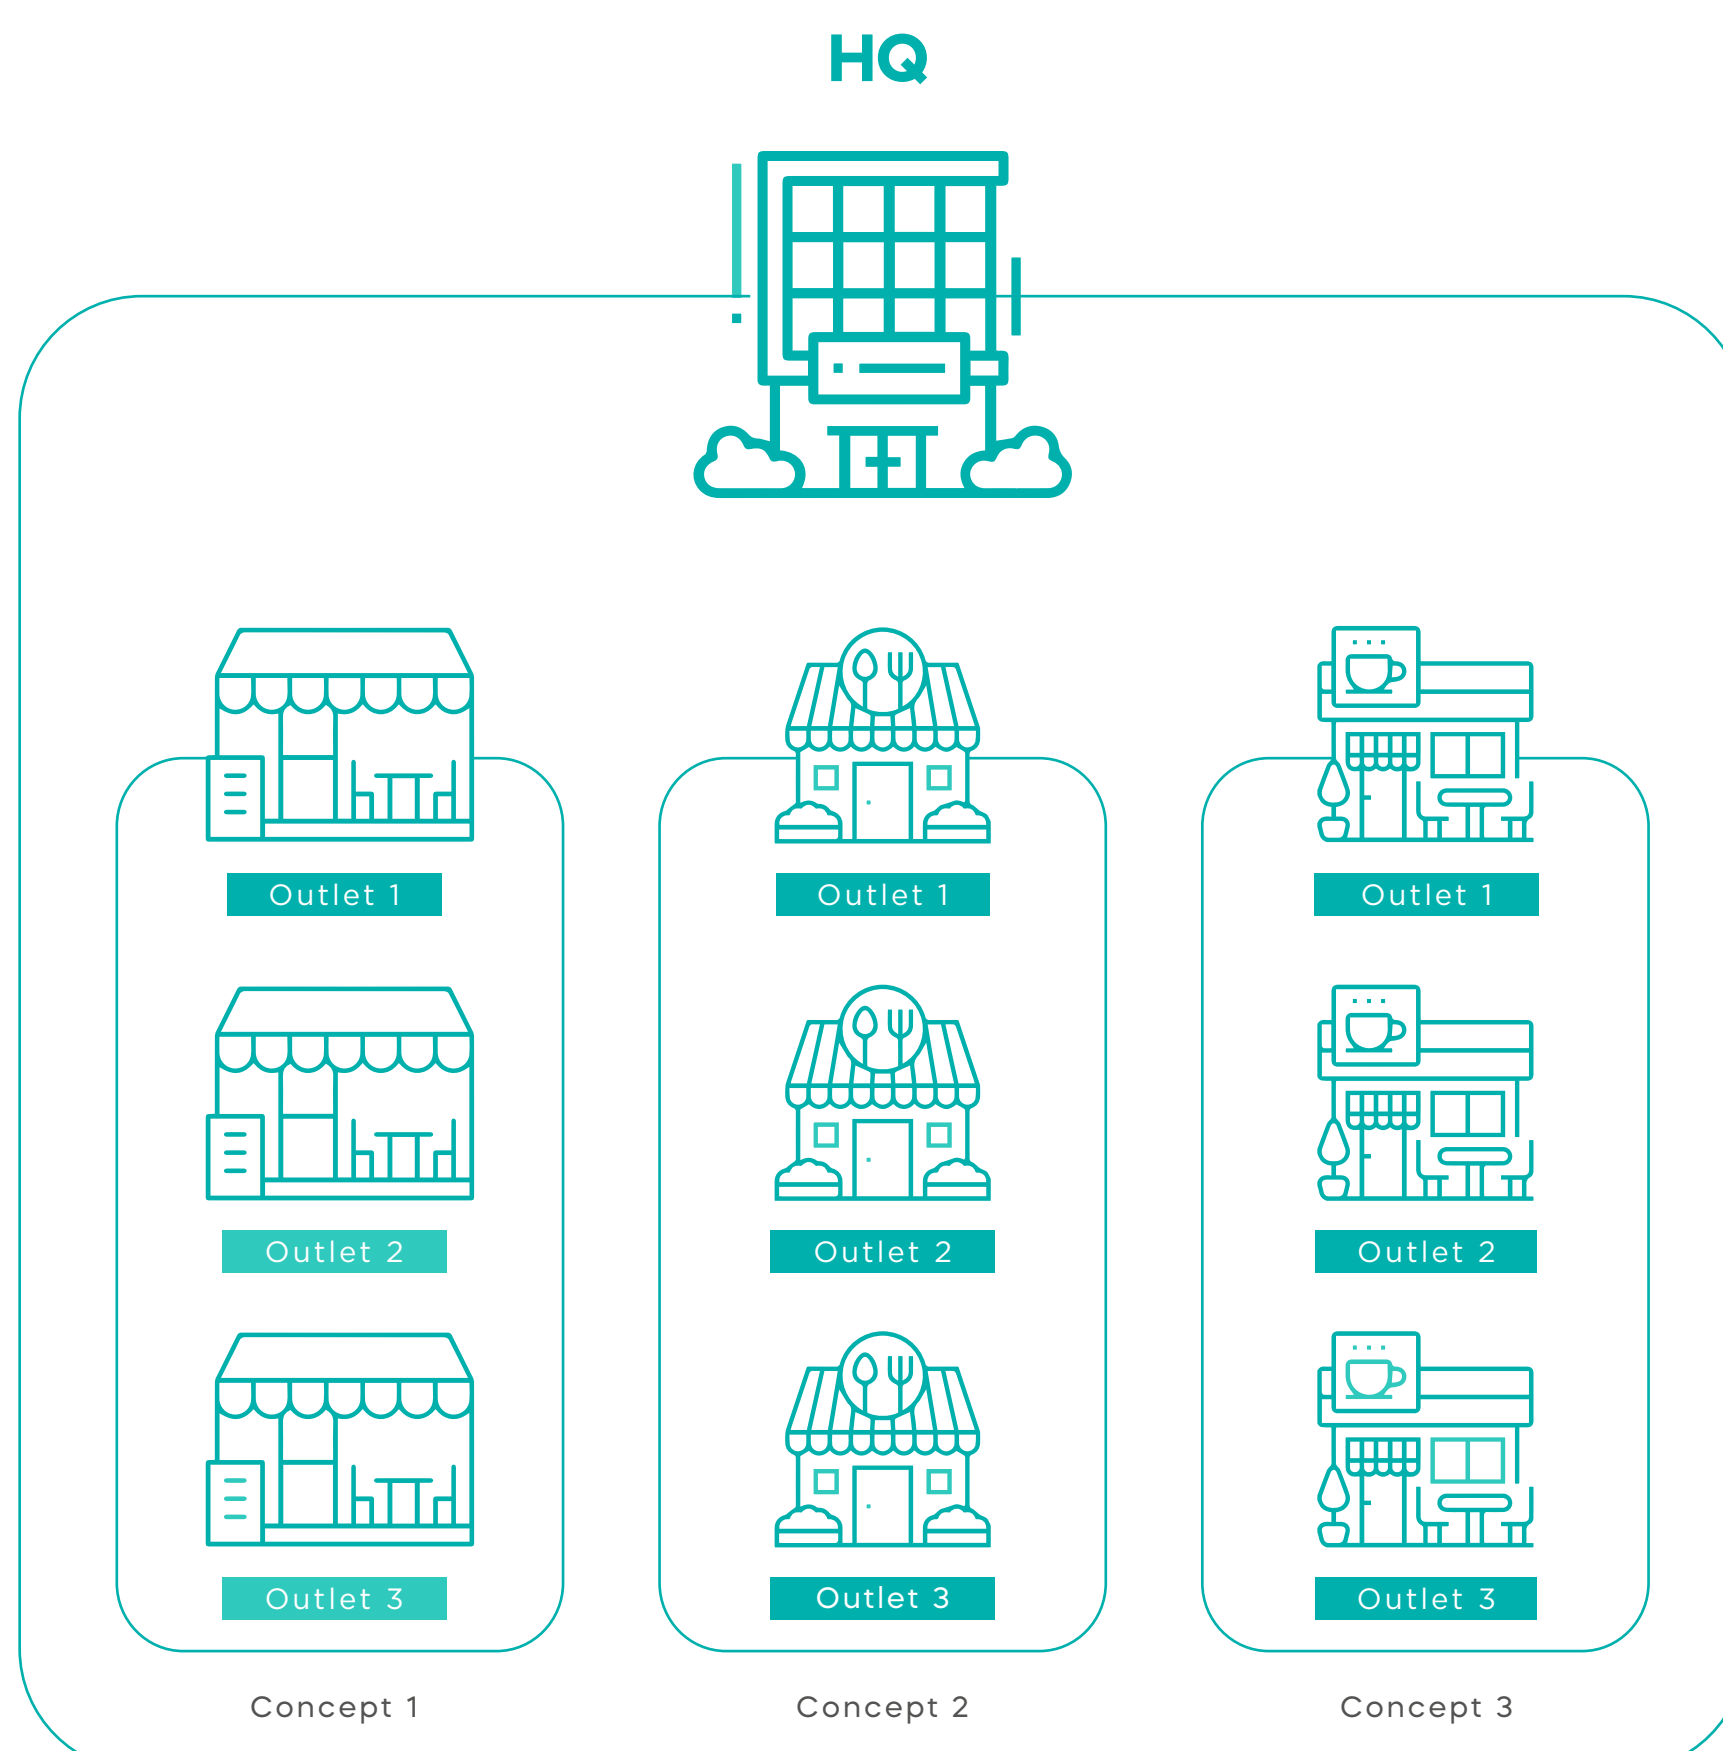

GOGMGO+ IS FOR MULTI-OUTLET OR

MULTI-CONCEPT OPERATORS

GOGMGO+ CAN WORK WITH ANY ORGANIZATIONAL CONFIGURATION

Our **GoGmGo+** includes a new, distinct **HQ account** that allows operators to:

- Aggregation of data and analytics
- Approval workflows
- New user roles for shared back-office
- Consolidated payroll – review and submissions
- Cross-outlet employee sharing with automatic Cost allocation
- Central management of menu master
- Aggregated accounts payable management
- And more...

GOGMGO PRICING IS **STRAIGHT FORWARD** AND CHARGED PER OUTLET — ONLY PAY FOR **ADD-ONS YOU NEED**

loyalty, reservations,
and crm

\$49

/MTH

Or \$499/yr (per pack)

A self-service ordering system
that frees up wait-staff and
reduces errors

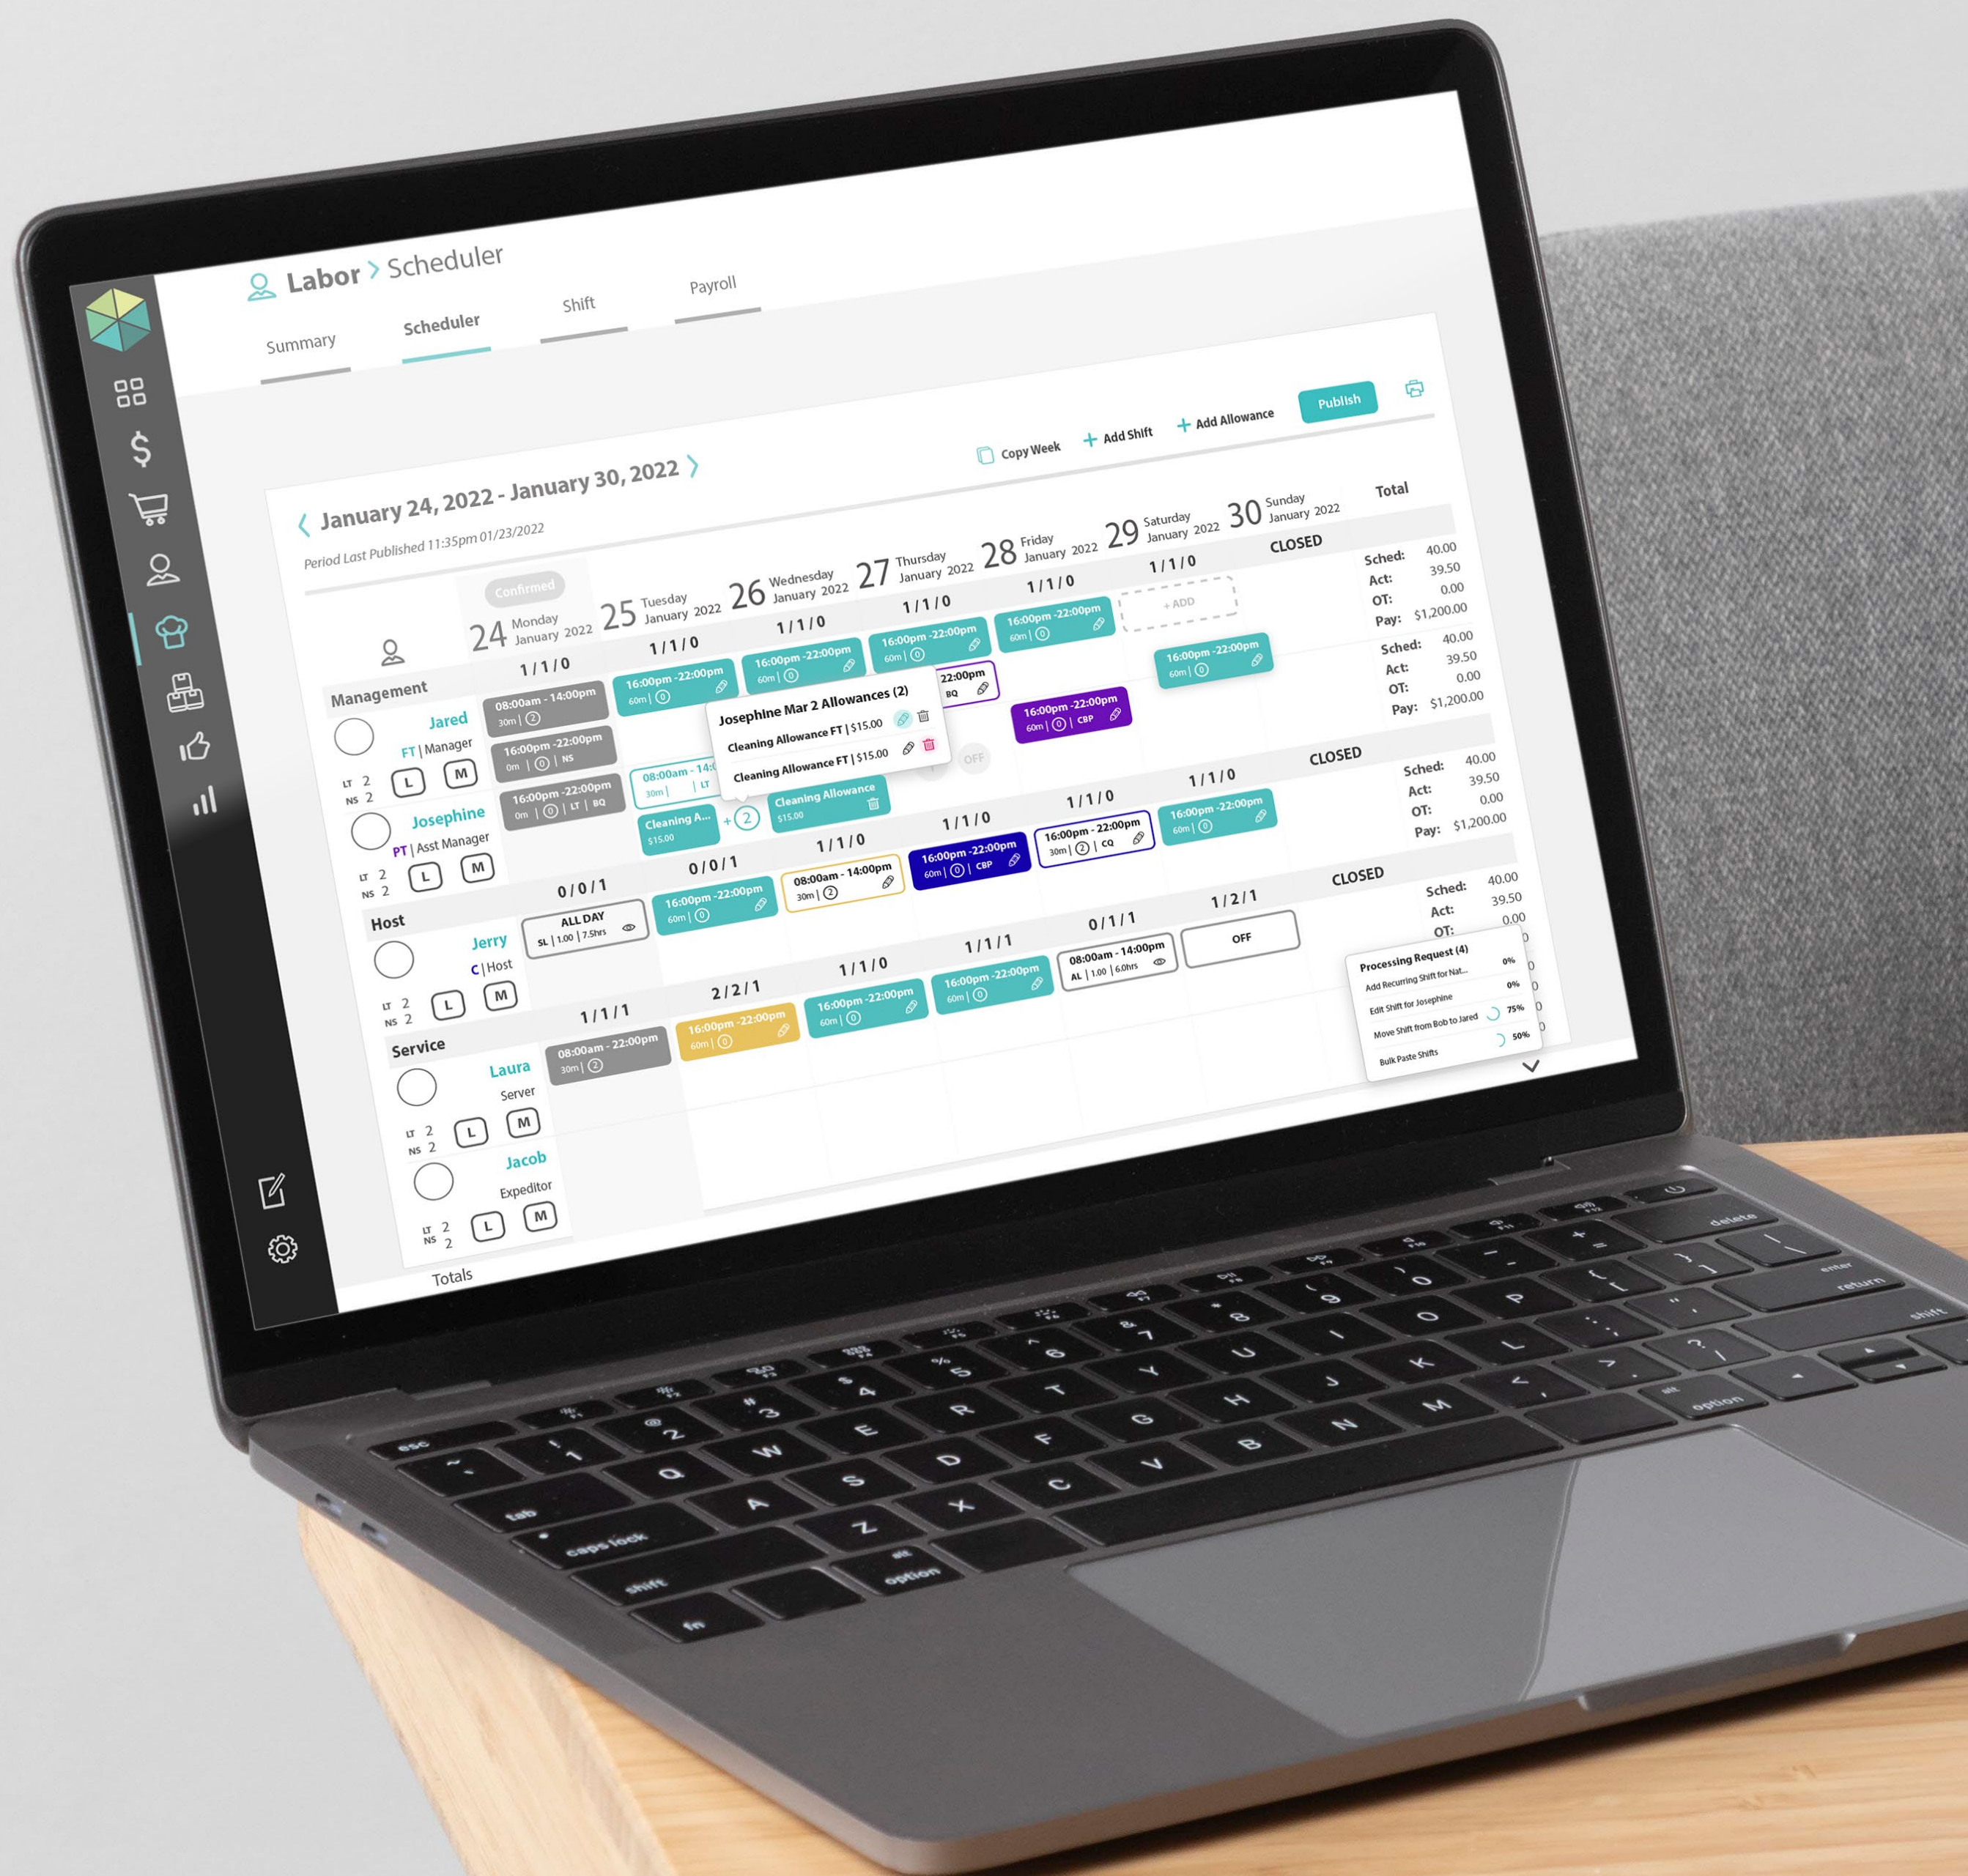

\$99

/MTH

Or \$999/yr

Comprehensive, fully-integrated cloud-based back office solution for f&b operators

Full accounting functionality including chart of accounts, GL, and bank reconciliation, automated daily sales and COGS entries, scheduled or manual expenses, and clear A/P

Inventory management with menu and recipe management, supplier orders and waste

Advanced data analytics for all modules and across modules

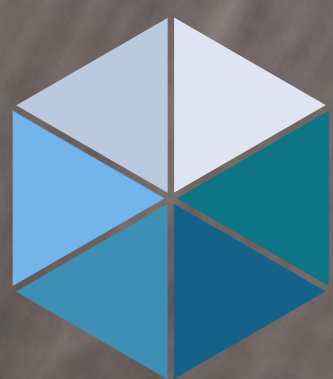

Digital manager log, online review aggregation, and flexible reporting

HR management, scheduling, payroll, and pay-slip generation

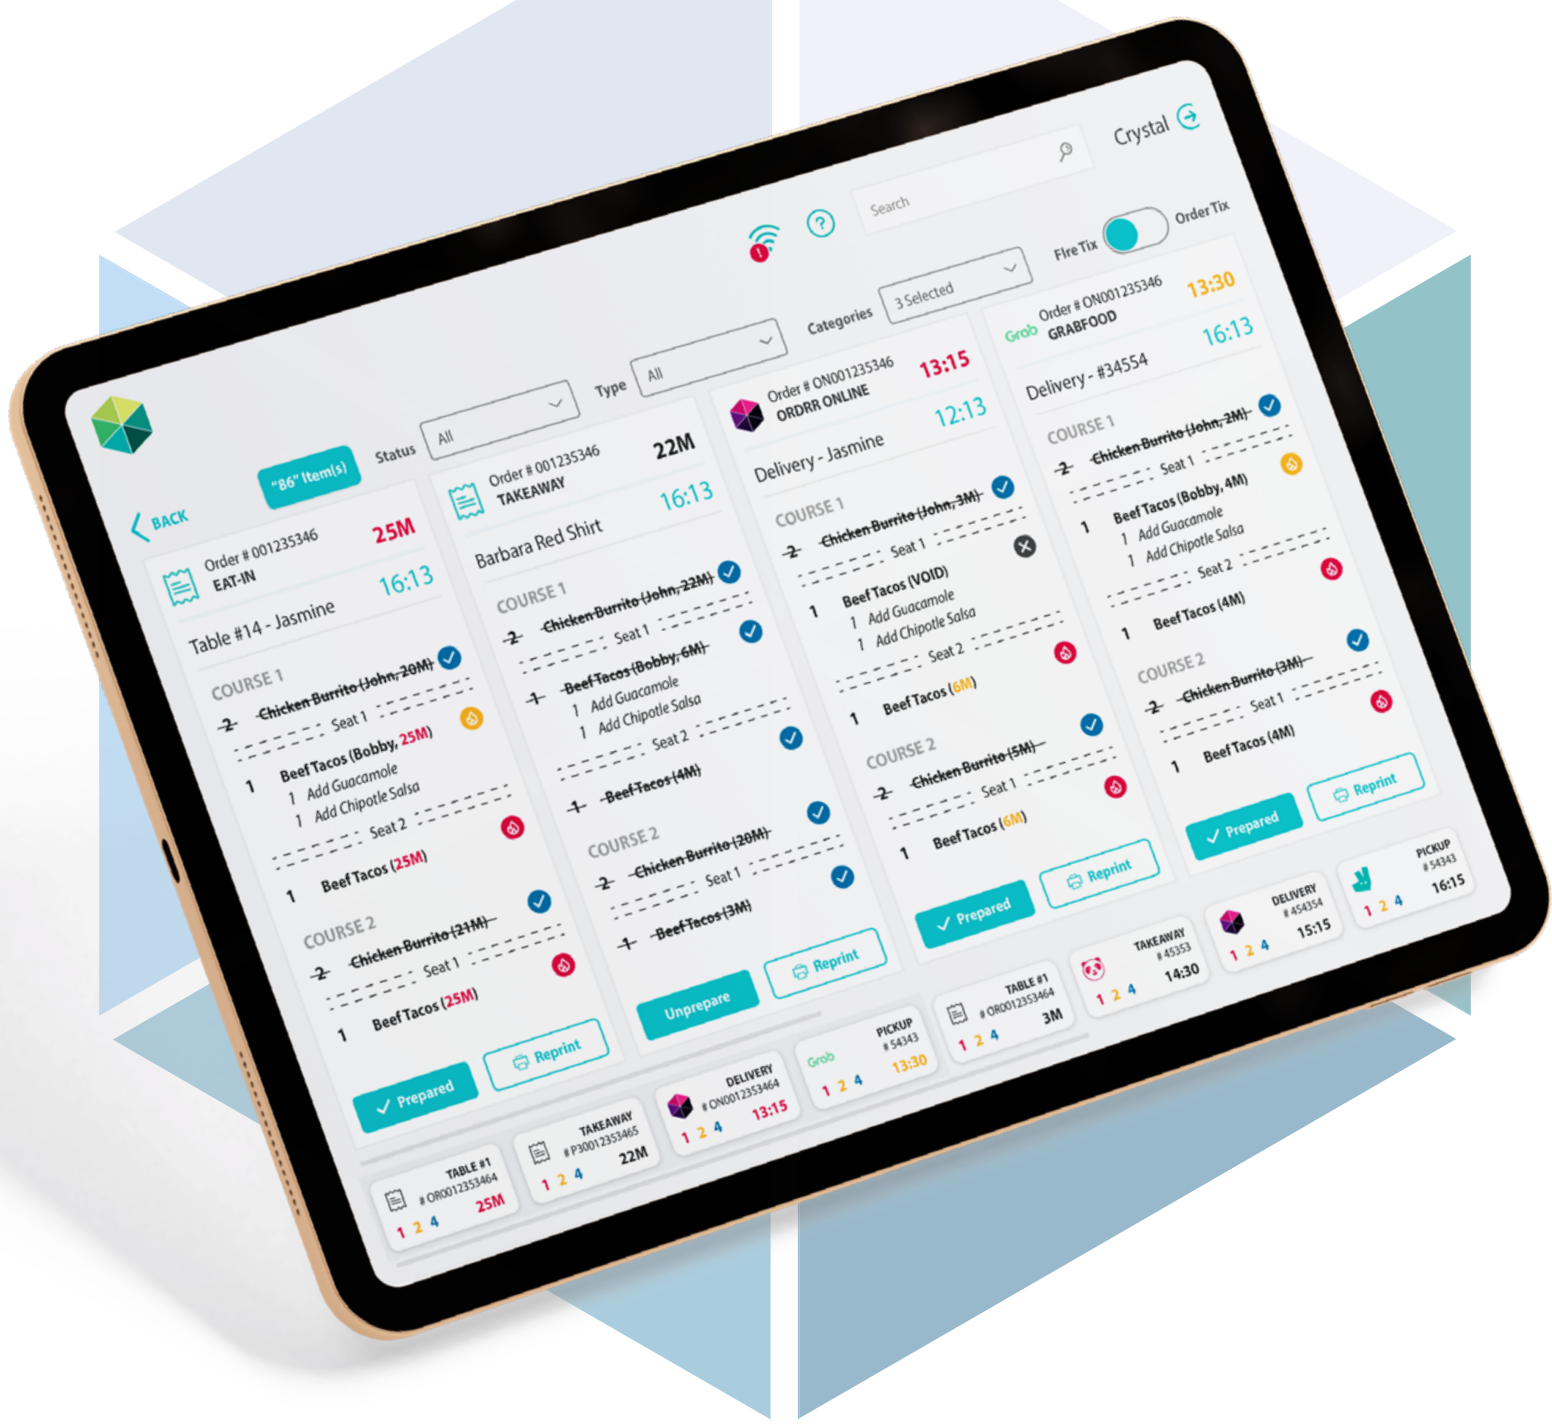

Multi-outlets operators should get GoGmGo+, which includes data and analysis aggregation, flexible approval workflows, and master settings management

GoPosGo

Intuitive and highly configurable iPad POS
system built for the f&b industry

- Real time sales analytics
- Offline mode
- Use your existing ipad

Best-in-class POS features, including:

- Full order lifecycle
- Item or bill-level discounts & refunds
- Automated-tax & service charges, configurable item-level
- Combine and transfer tables
- Choice of paper & email receipts

Kitchen Management system with “86” menu item feature

Powerful promotion engine that allows auto-application to menu items with a single click or based on rules

Use your own payment processor or take advantage of competitive offers from from one of our industry-leading payment partners

Flexible payment acceptance with multiple split bill options

SINGLE-VIEW OF CLIENTS VIA EMBEDDED CRM

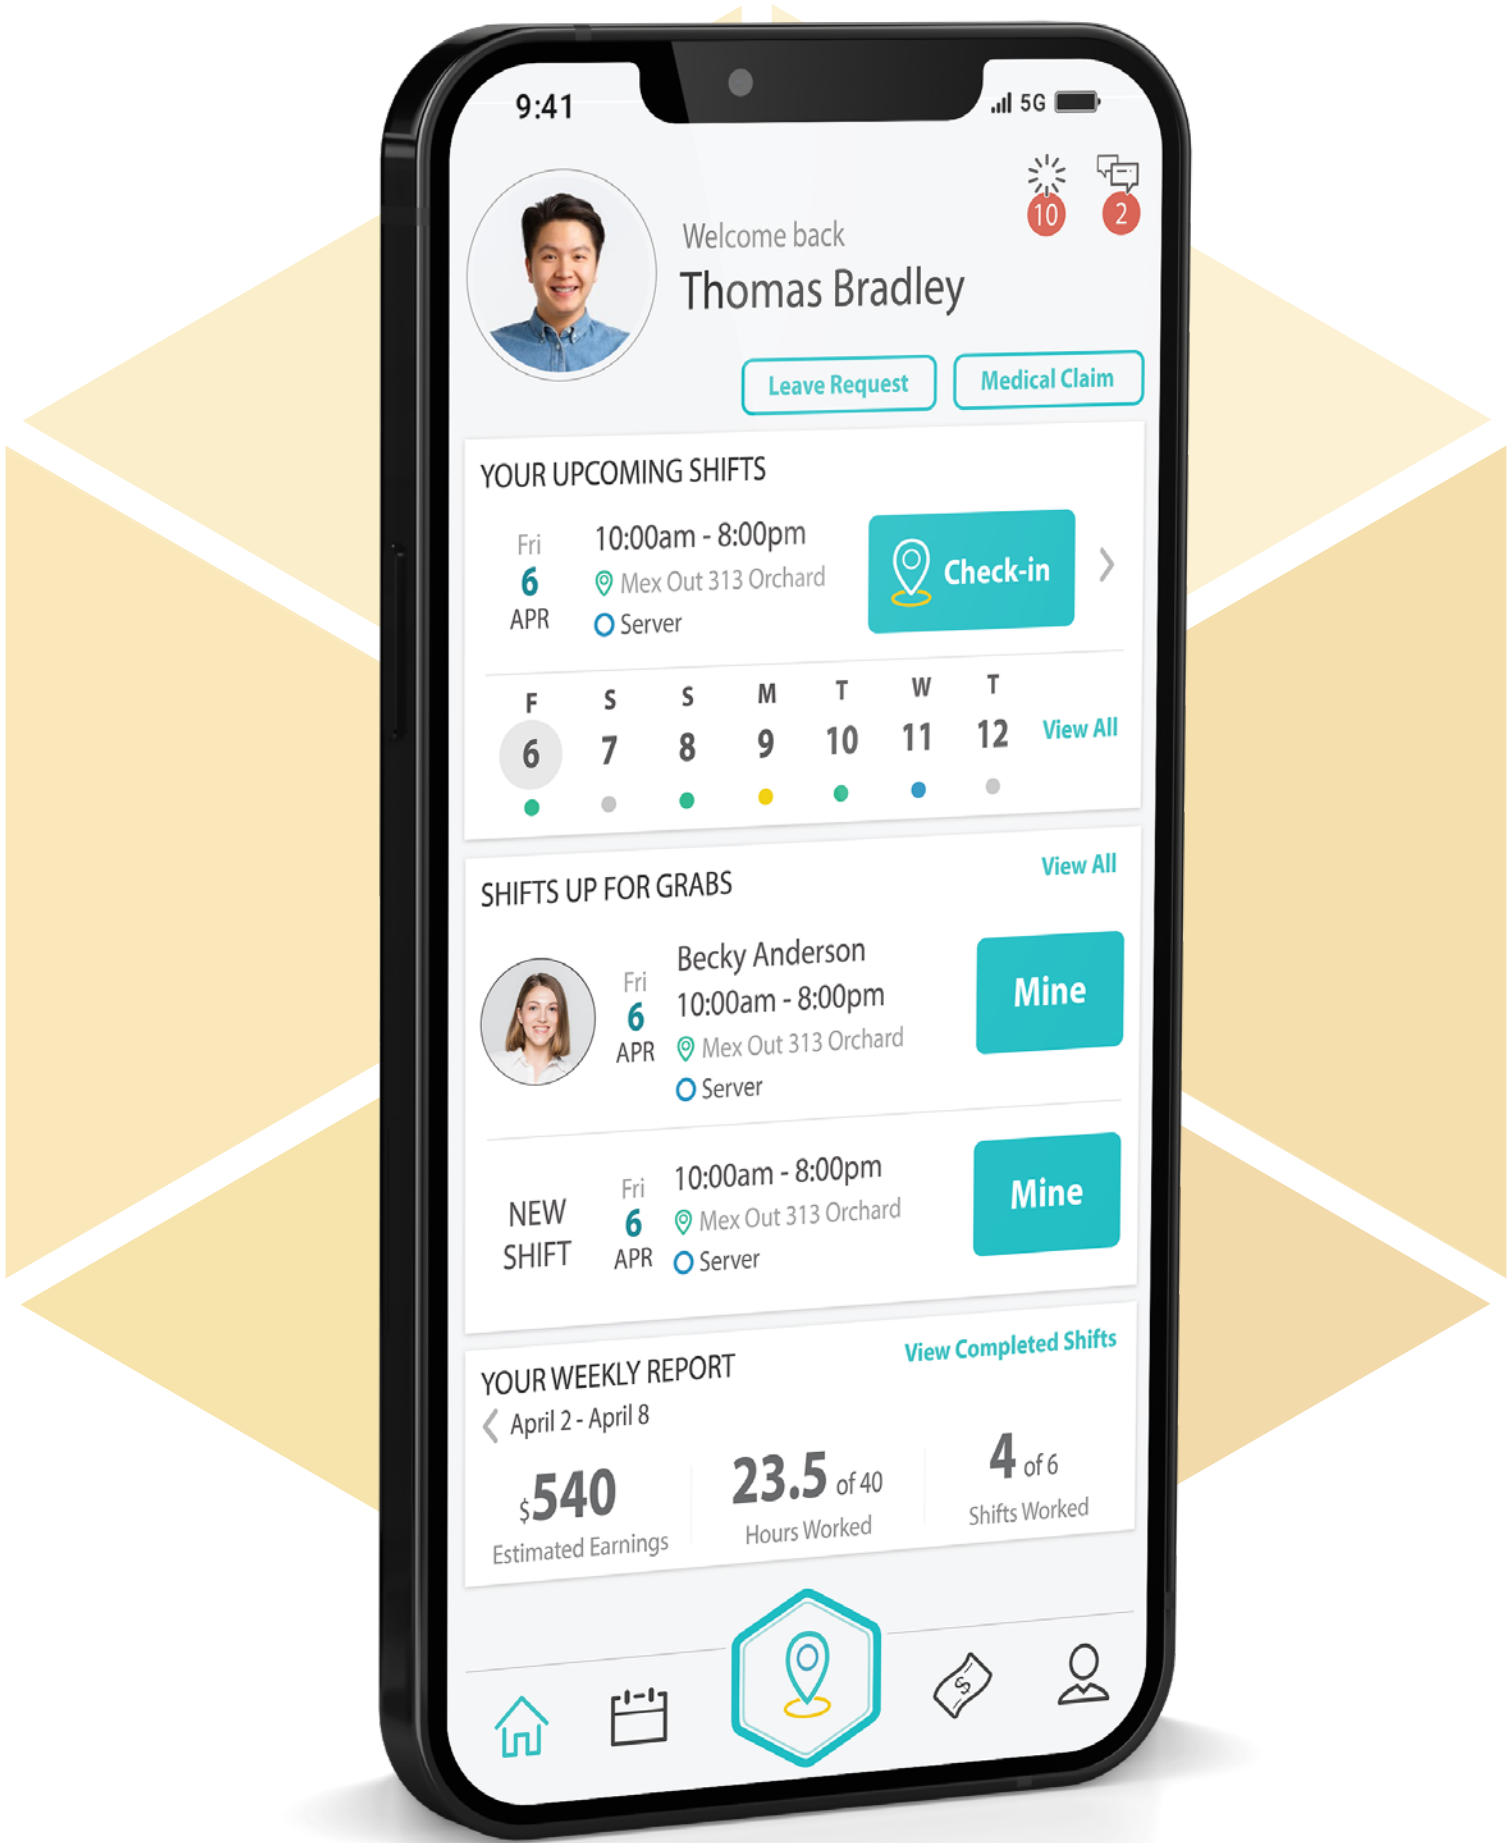

Take real time action to improve their current visit's experience and increase sales opportunities.

GoHrGo

A user-friendly mobile app to empower staff
and remove managers as bottlenecks

Real time publishing of roster, daily accrued pay & digital pay-slips gives full transparency without the paper and questions

Grab, swap, and give-up shifts functions let your staff collaborate and take ownership of their scheduling changes while ensuring optimal shift coverage

Geolocation-enabled check in/out means no need for dedicated hardware like thumbprint scanners or paper timecards

Self-service leave and medical claim requests handled via App means simplified approval process and recordkeeping

Ordr

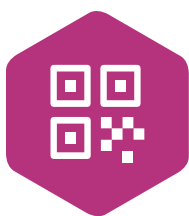

A self-service ordering system that frees up wait-staff and reduces errors

Let your customers and servers co-manage the ordering process.

Game-changing 2-way integration with our POS, GoPOSGo.

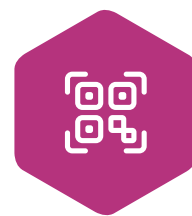

Want to use QR for dine-in and takeaway? Onsite ordering made easy by linking a QR code to a table or a third party buzzer.

Configurable order experience with **ratings capture**

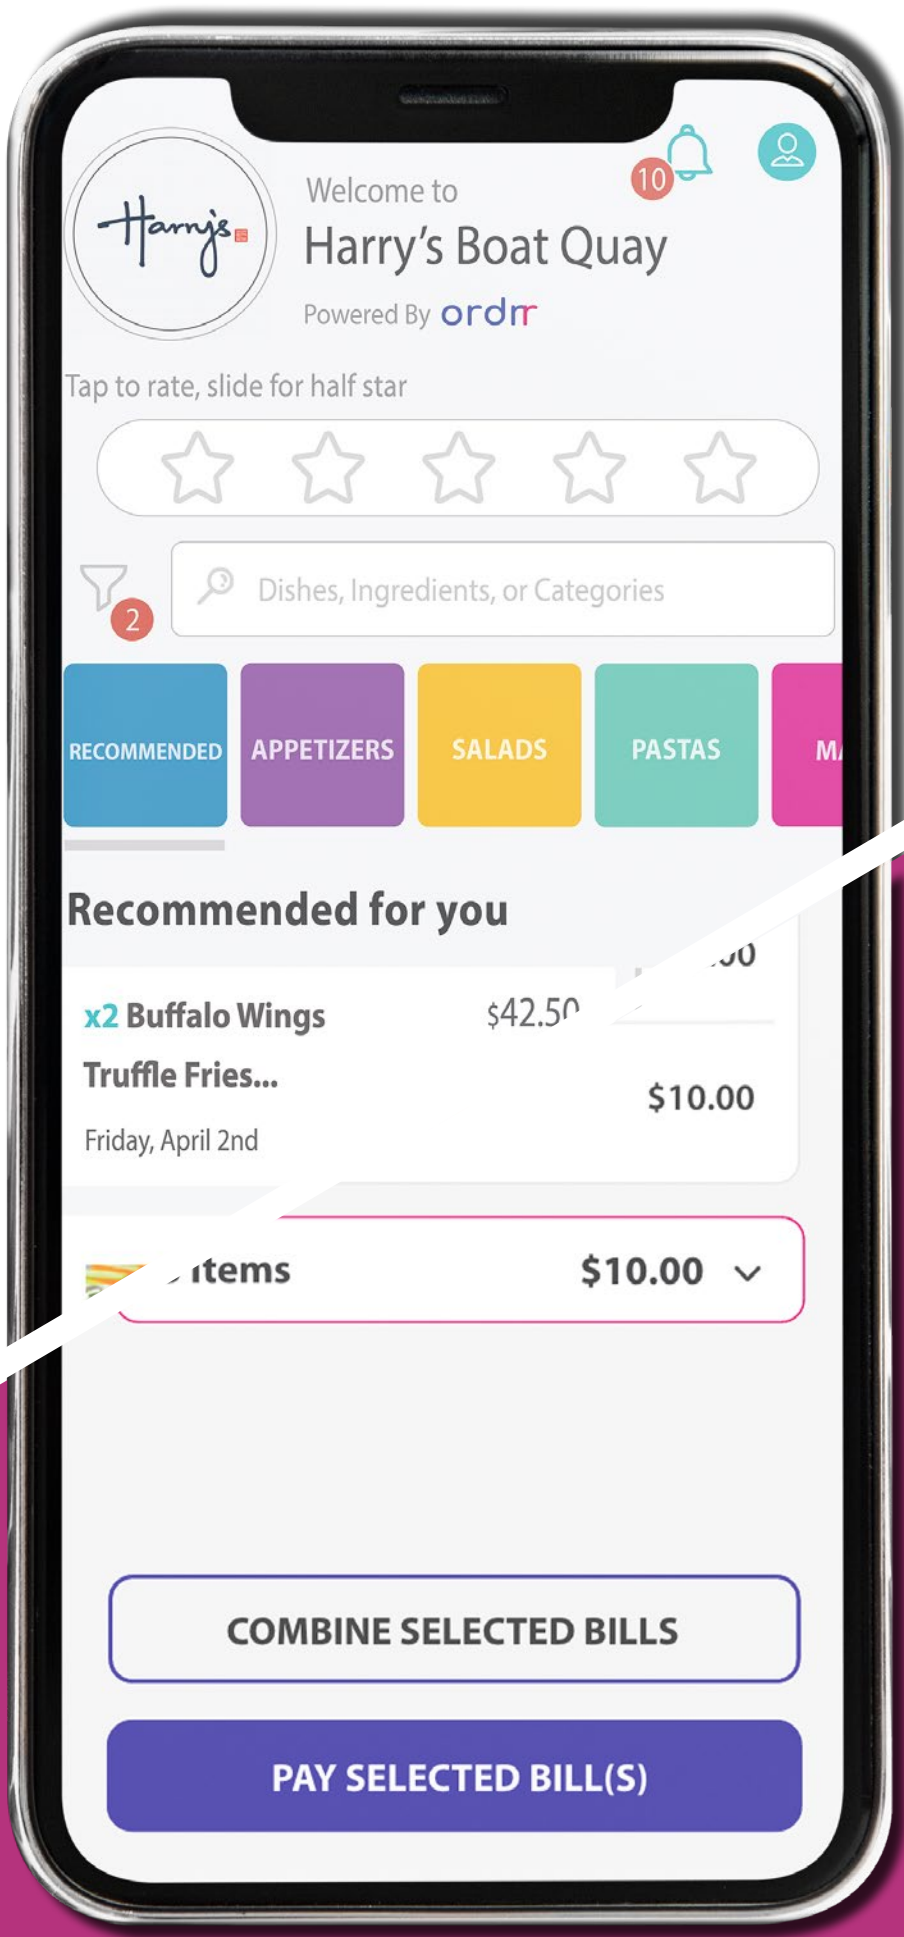

Pulls menu data from GoGMGo rather than requiring separate upload and management

Seamless loyalty experience

Ordr QR

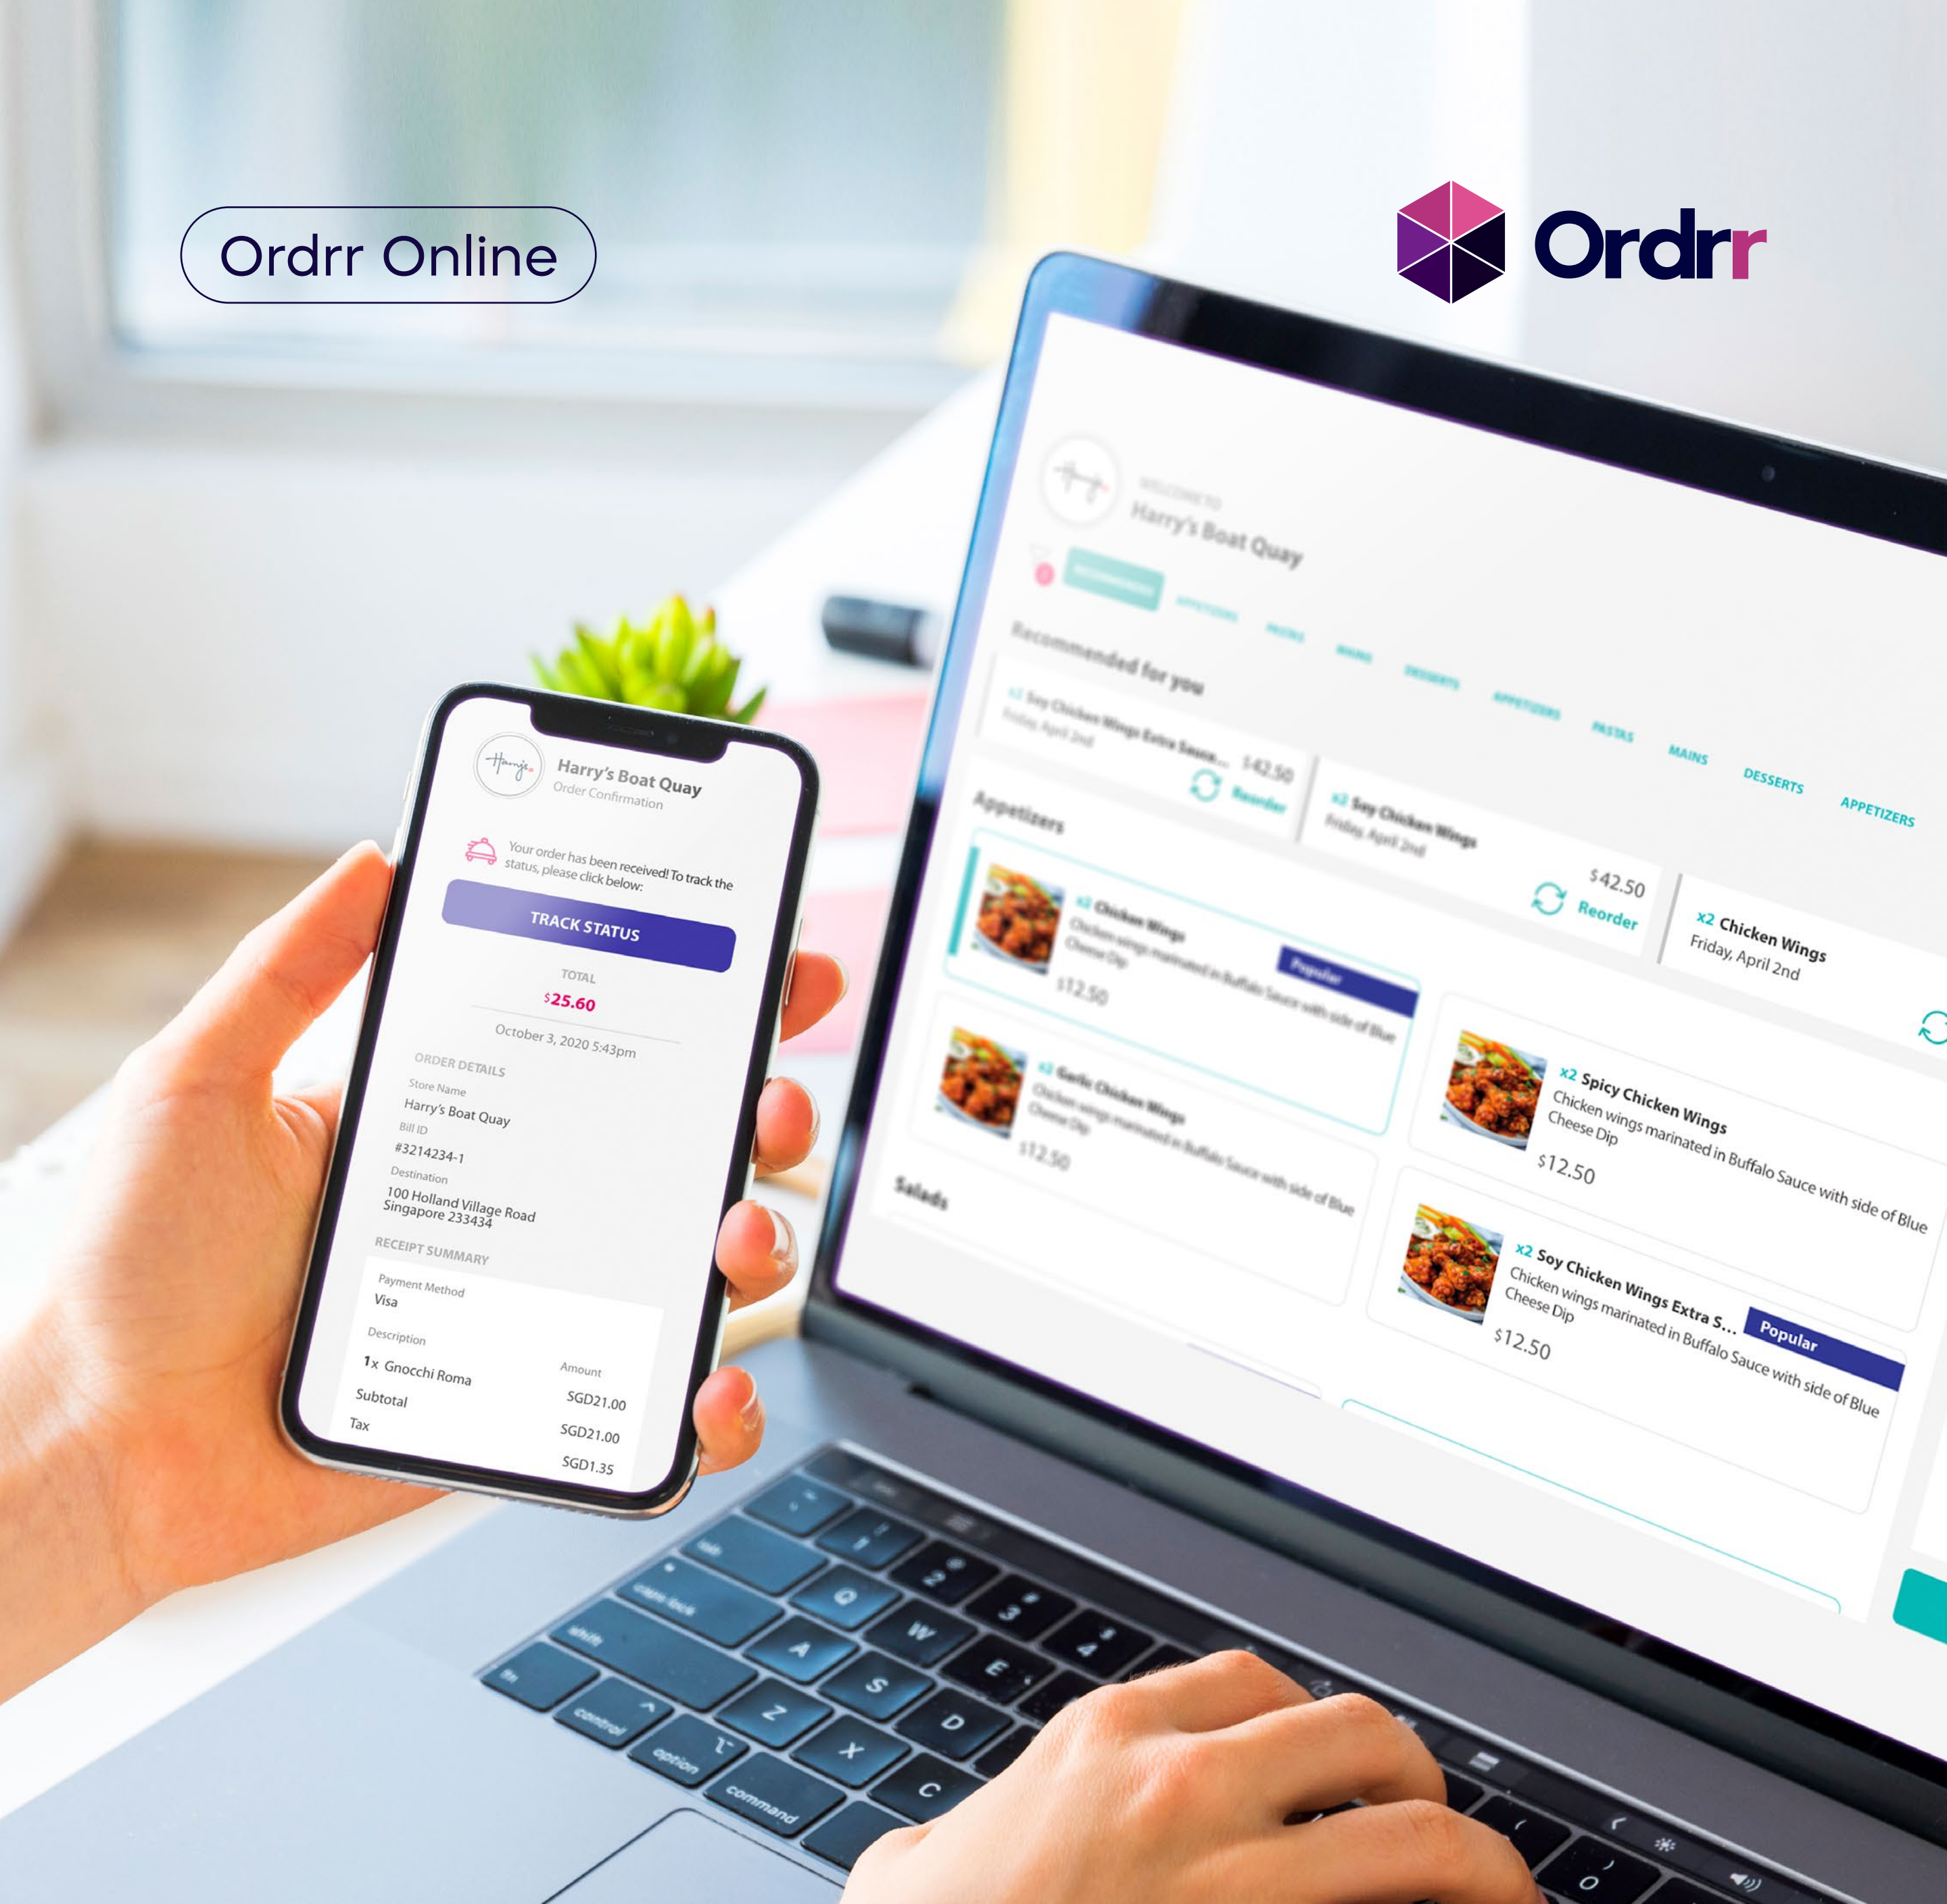

Ordr Payments

Want to really save manpower costs? Add on our integrated Ordr Payments solution to allow customers to settle their own bills by accepting major credit cards and Apple Pay seamlessly from their own devices.

But isn't it too complex for customers to handle payments themselves? **Orders can be combined or split in many ways:** under a single bill, bill by device ordered, split bill evenly, split bill by amount, or even split bill by item. All of this is possible with a fully integrated system.

Need a brand-aligned online presence in seconds? Turn on Ordrr Online and start accepting pick-up or delivery orders from any device.

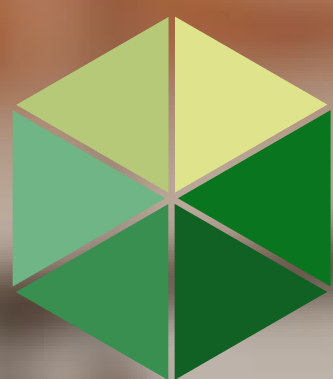

Stop waiting for drivers to respond to your requests with integrated logistics providers like Lalamove.

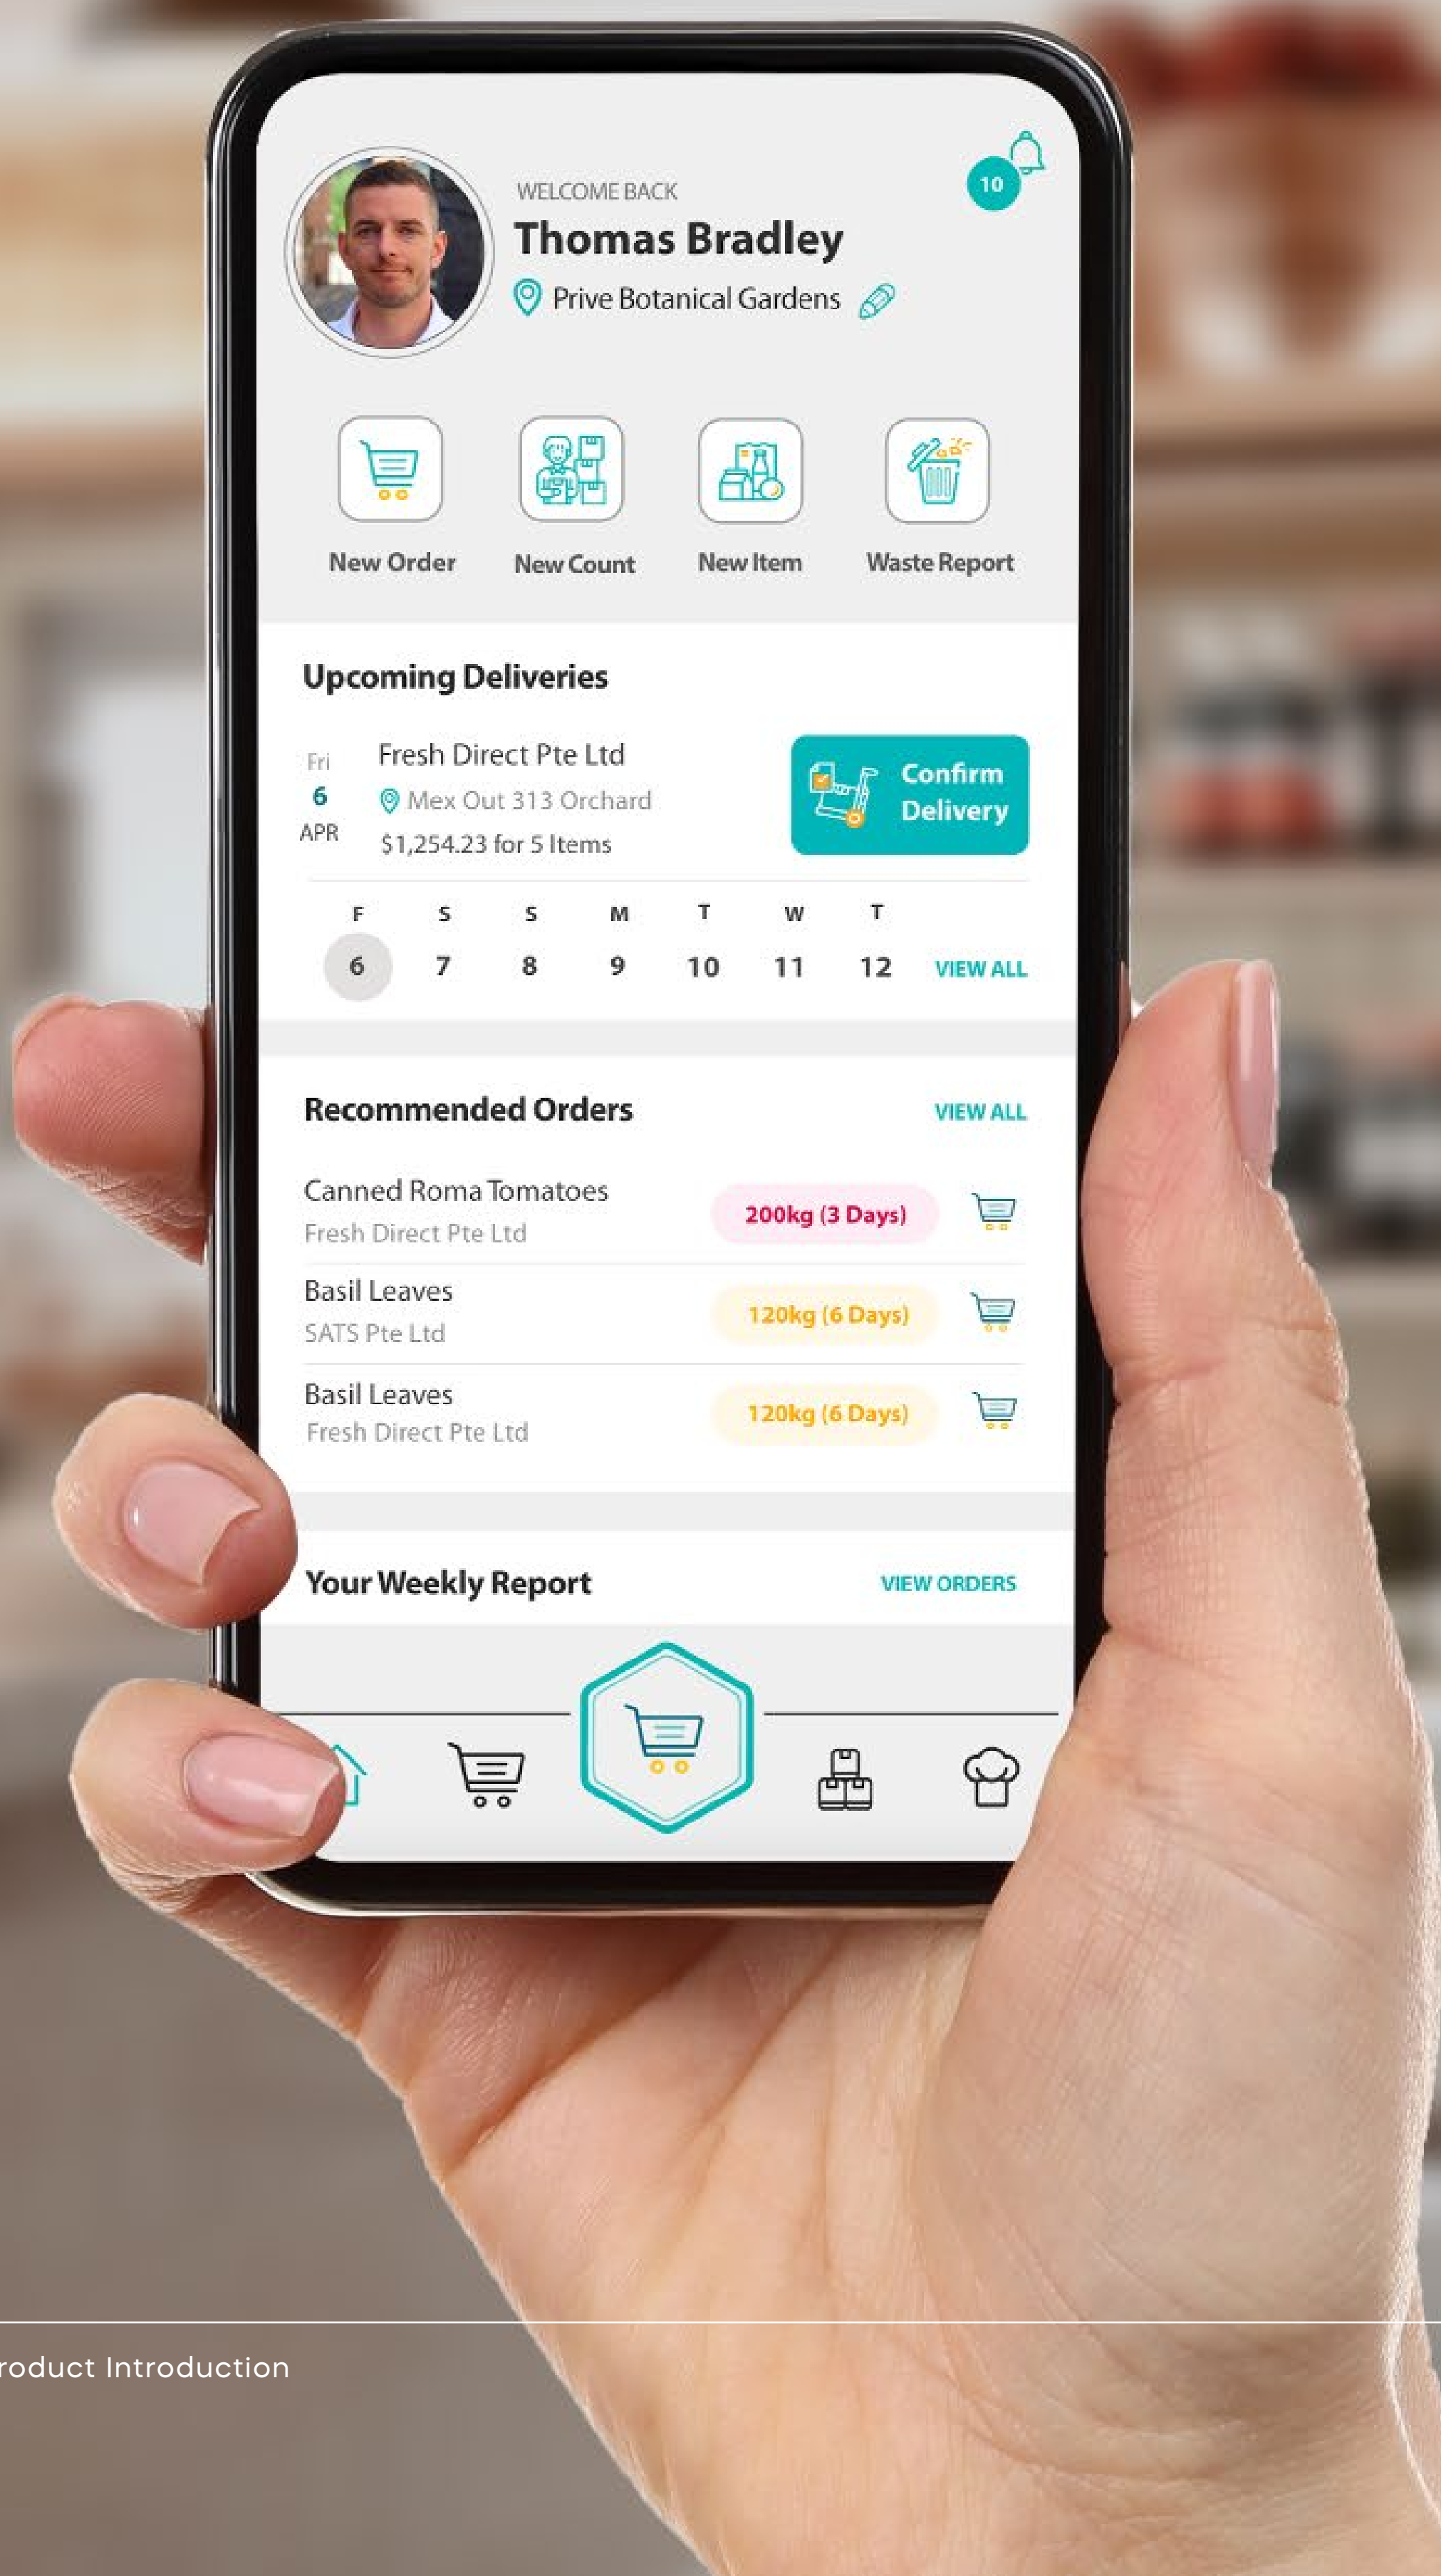

Not another menu to manage for yet another channel. We inherit all menu info, pricing and images that you want to be shown since we're already your menu engineering solution.

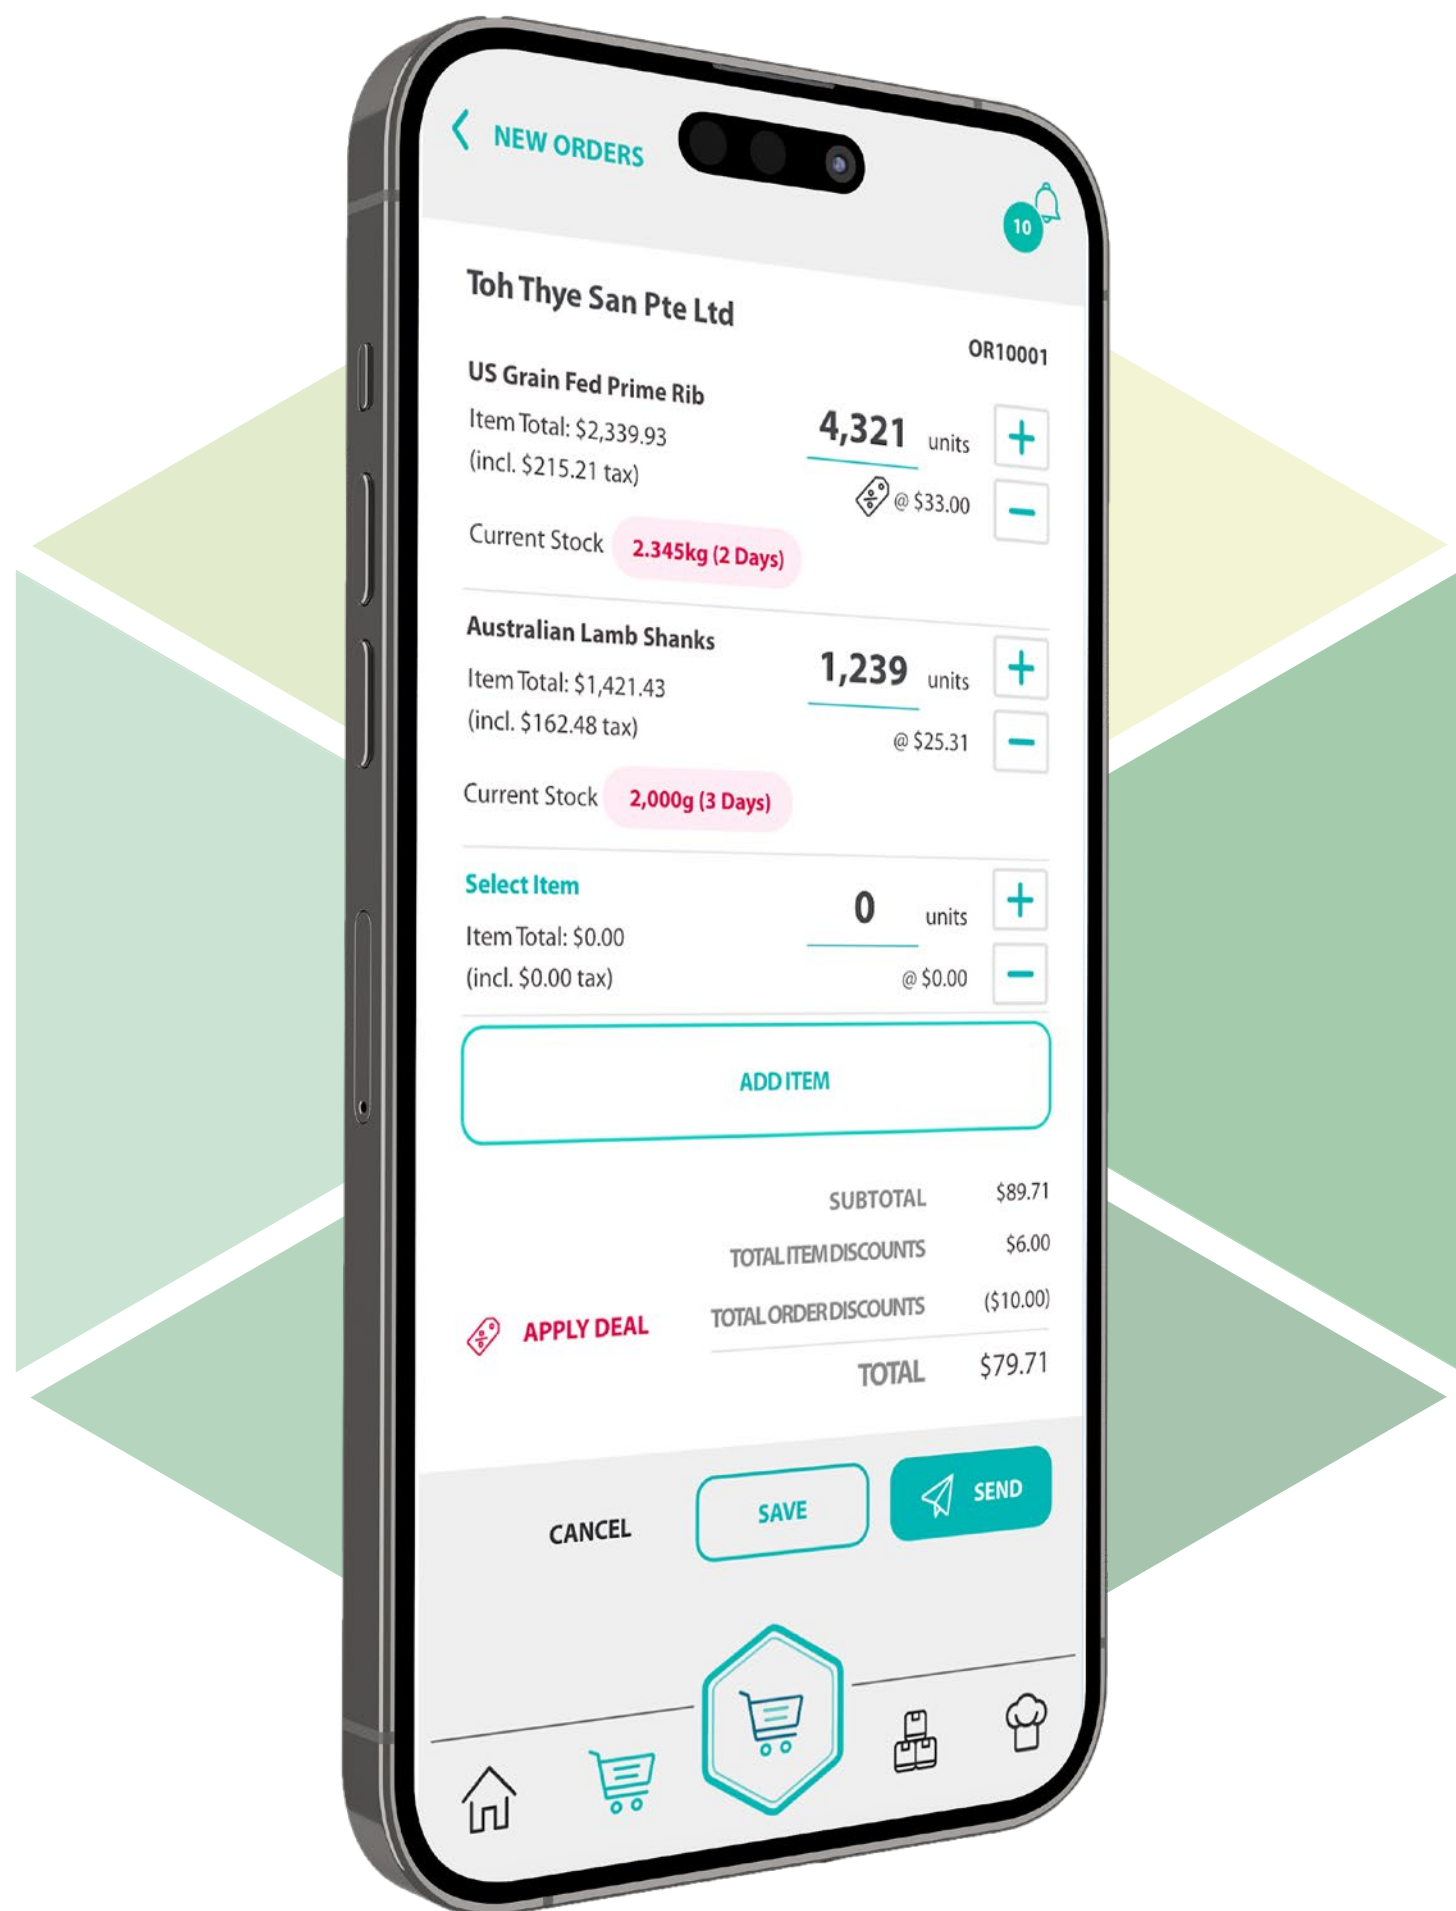

Accept integrated payments with our partner, **stripe**

GoChefGo

Your chef's new best friend, right in their pocket.

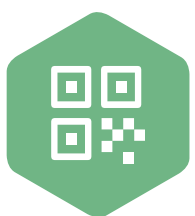

Can't remember what you wanted to add to that order? Casually add your items to order baskets as you go along the work day and submit to your suppliers from your own iOS or Android mobile device whenever convenient.

No more back and forth between paper and excel for stock taking. Configure and perform adhoc or pre-scheduled stock counts and submit directly to GoERPGo's inventory management module to get your variance analysis instantly.

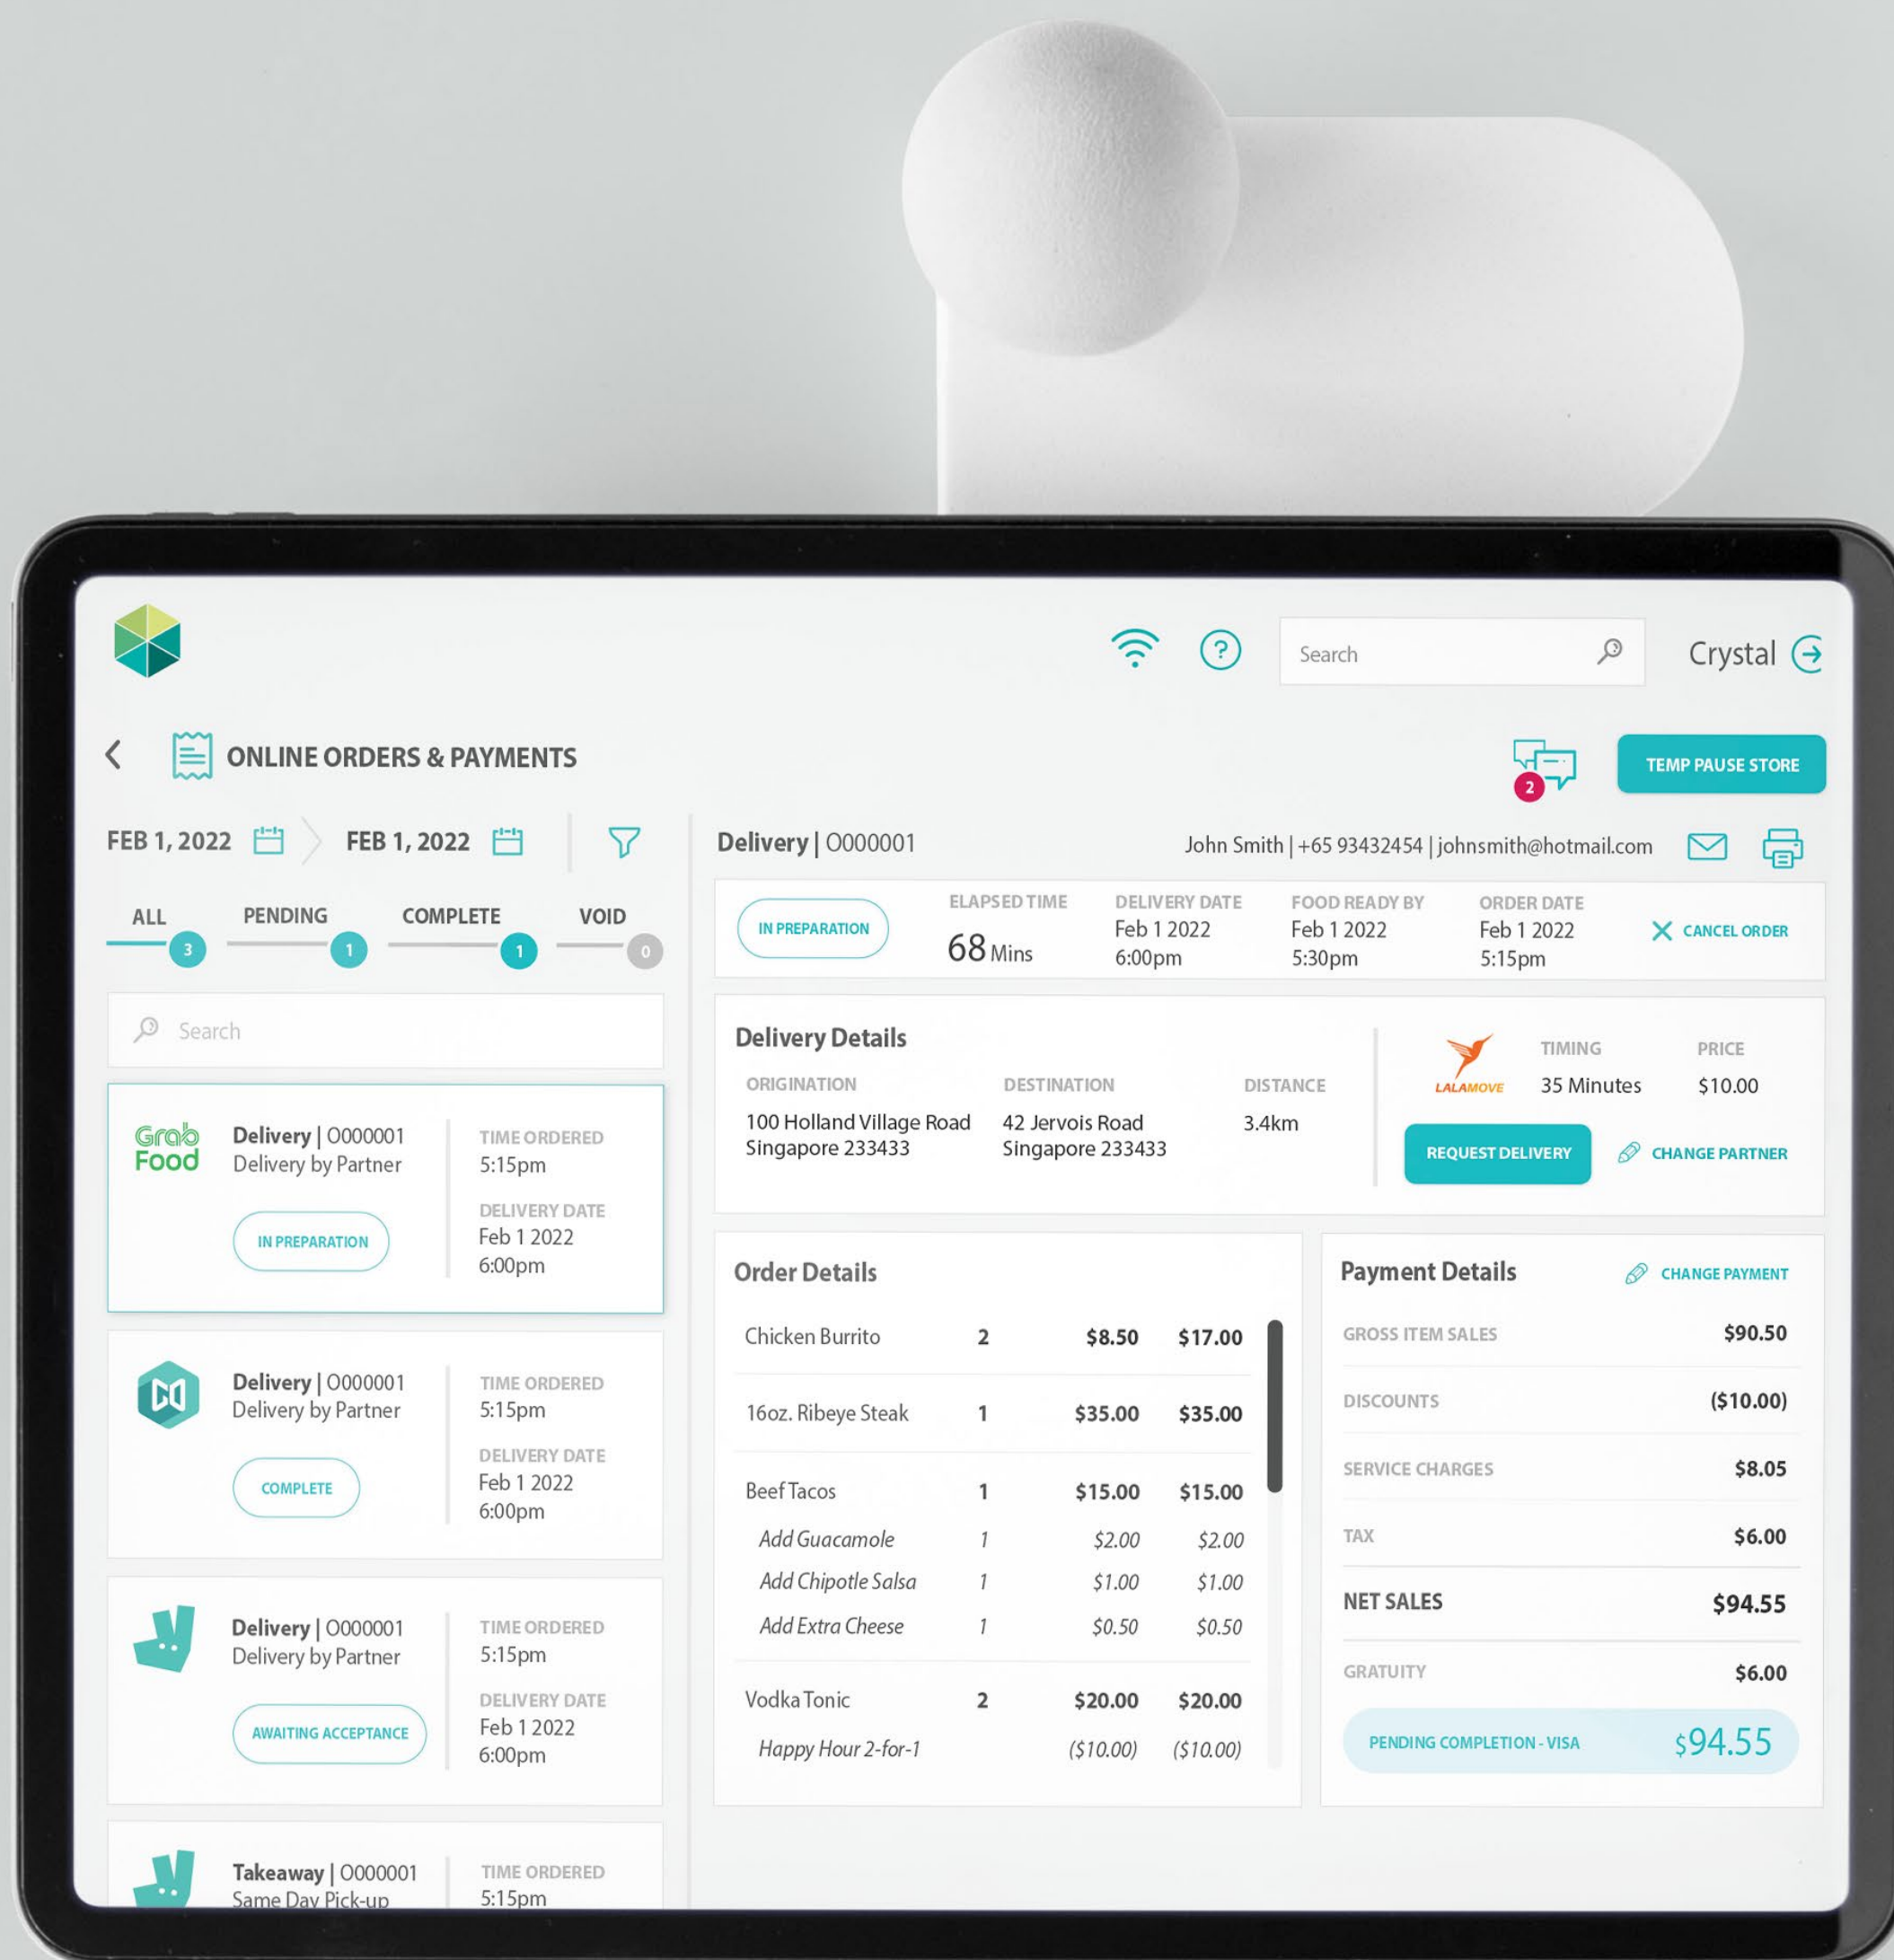

Stop typing out orders to your suppliers on WhatsApp. In 2 clicks you can share generated purchase orders from GoChefGo across your mobile device's communication platforms that you share with suppliers.

Don't guess what you need to buy anymore. Get auto-recommended items at risk of running out based on inventory levels and actual usage velocity.

Links to save time and reduce errors with automated information flow

LOYALTY	ONLINE ORDERING	RESERVATION	MARKETING & CRM
			
			
			
			

NEW PARTNERS WILL CONTINUE TO BE ADDED

Note: Logos shown represent current or potential partners

Online Ordering & Delivery: Central menu management and pricing as well as straight-through order management from customer’s phone to the kitchen display system

Loyalty: Finally see your regulars’ dining preferences and loyalty programme effectiveness by linking POS order data and broader CRM data

Marketing & CRM: Beef up your marketing and acquisition analysis with linkage to POS order data

Table & Reservation Management: Rationalise reservation channel costs by linking turn-up rates and POS order data to generate more complete acquisition analysis
